

PowerPolish™ Diamonds

Repair, Prep, and Polish!

As part of our comprehensive concrete restoration program, Pioneer Eclipse offers **PowerPolish™ Diamonds** for repairing damage and restoring gloss to polished floors.

PowerPolish Repair Disc:

For floors that show distinct wear patterns, surface scratches, acid etching or for floors that have never been polished before.

The PowerPolish Prep Disc:

For preparation of the floor prior to densifying.

The PowerPolish Blue Disc:

Designed to be used consecutively until your desired finish is achieved.

- PowerPolish #1 Blue Disc: Matte finish
- PowerPolish #2 Blue Disc: Semi-gloss finish
- PowerPolish #3 Blue Disc: High-gloss finish
- PowerPolish #4 Blue Disc: Ultra high-gloss finish

RECOMMENDED PRODUCTS

The 225GP is an electric powered machine designed for edges and small areas.

The 430GP is a multipurpose, propane powered machine designed to polish, strip, and scrub hard floors.

HardCore hard floor densifier hardens the floor surface and LockOut hard floor protector provides stain and wear defense.

PROCESS

(each diamond grit requires 2-4 passes)

- Step 1 - Repair
- Step 2 - Prep
- Step 3 - Densify with HardCore
- Step 4 - Polish (to desired appearance)
- Step 5 - Apply LockOut and burnish

TECHNICAL DATA

Disc Size 3 in (83 mm)
