

Telematics

Telematics utilizes cellular communications to monitor and track machines in real-time.

WHY TELEMATICS:

REAL-TIME INFORMATION

- Run time
- Charging time
- Location

CUSTOMIZABLE REPORTS

- Alert notifications (power disconnections, battery status, device shutdowns)
- Track parameters (location via GPS, battery, charge, speed and machine health)
- Receive daily or weekly email reports

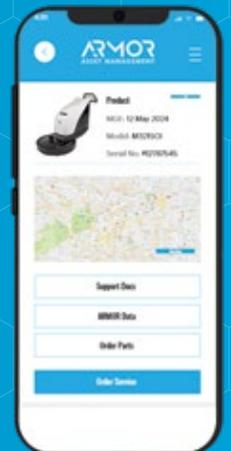

GPS TRACKING

- Machine location
- Track multiple machines
- Helps with theft recovery

Telematics unit is mounted to machine

Utilizes cellular technology to collect data

Information accessible on a phone or computer
